DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 21 is rejected under 35 U.S.C. 102(b) as being anticipated by Sturm *et al.* Sturm *et al.* shows all of the features of the instant invention including apparatus for matching digitized portal images and tracking movement (column 3 lines 1-25).

Allowable Subject Matter

3. Claims 1-20 and 26-28 are allowed.

4. Claims 22-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The following is a statement of reasons for the indication of allowable subject matter: claims 1-20 address the output of matched DPIS (an image created during x-ray radiation therapy) and DSIS (the therapy simulation image), claims 22-25 address robust motion flow for tracking movement of portal images, and claims 26-28 address the output of matched x-ray and
